

[The Jet Age Of Tomorrow Voyager Zip Download Free Software](#)

The screenshot shows a software window titled "The glymphatic system (or glymphatic clearance pathway, or paravascular system) is a functional waste clearance pathway for the vertebrate central nervous system (CNS)[1] The". The window has a menu bar (File, Edit, Search, Learn, View, Toolkit, Window, Help) and a toolbar with icons for Contents, Search, History, and a TO DO list. The main text area contains the following paragraph:

The glymphatic system (or glymphatic clearance pathway, or paravascular system) is a functional waste clearance pathway for the vertebrate central nervous system (CNS).^[1] The pathway consists of a para-arterial influx route for cerebrospinal fluid (CSF) to enter the brain parenchyma, coupled to a clearance mechanism for the removal of interstitial fluid (ISF) and extracellular solutes from the interstitial compartments of the brain and spinal cord. Exchange of solutes between CSF and ISF is driven primarily by arterial pulsation^[2] and regulated during sleep by the expansion and contraction of brain extracellular space. Clearance of soluble proteins, waste products, and excess extracellular fluid is accomplished through convective bulk flow of ISF, facilitated by astrocytic aquaporin 4 (AQP4) water channels.

Below the text is a metadata dialog box titled "Element Priority" with the following fields:

Position [1..Total]	305806	Forgetting index	10	OK
Percent [0..100%]	42	Δ-Factor	1.336	Help
Interval (remaining)	2	Ordinal	738369.24	Cancel

The dialog box also features a color gradient bar and a list of related topics:

- Before: Topic #750,866: Morpheesins are proteins that can form two or more different homo-c
- Current: Topic #750,857: The glymphatic system (or glymphatic clearance pathway, or paravascular system) is a func
- After: Topic #750,545: The term "autapse" was first coined in 1972 by Van der Loos and Gla

On the right side of the window, there is a diagram titled "The Glymphatic Pathway" showing the flow of CSF from the brain surface through a para-arterial space into the brain parenchyma, and its subsequent clearance. Below the diagram is a legend for "Metabolic Waste Clearance" with icons for Neuron, Astrocyte, Aquaporin-4, Amyloidβ, and Glycogen. At the bottom right, there is a fluorescence microscopy image of brain tissue showing green and red structures.

The bottom of the window has a toolbar with buttons for "Learn", "Add new", and "Learn", "Edit", "Read", "Compose", "Tools", "Alarm".

The screenshot shows a software window titled "SuperMemo 18: d:\colls\". The main text area contains a paragraph about the glymphatic system: "The glymphatic system (or glymphatic clearance pathway, or paravascular system) is a functional waste clearance pathway for the vertebrate central nervous system (CNS). The pathway consists of a para-arterial influx route for cerebrospinal fluid (CSF) to enter the brain parenchyma, coupled to a clearance mechanism for the removal of interstitial fluid (ISF) and extracellular solutes from the interstitial compartments of the brain and spinal cord. Exchange of solutes between CSF and ISF is driven primarily by arterial pulsation and regulated during sleep by the expansion and contraction of brain extracellular space. Clearance of soluble proteins, waste products, and excess extracellular fluid is accomplished through convective bulk flow of ISF, facilitated by astrocytic aquaporin 4 (AQP4) water channels."

Overlaid on the text is a dialog box titled "Element Priority" with the following fields:

- Position [1..Total]: 305806
- Percent [0..100%]: 42
- Interval (remaining): 2
- Forgetting index: 10
- A-Factor: 1.336
- Ordinal: 738369.24

Buttons for "OK", "Help", and "Cancel" are visible.

To the right of the text is a diagram titled "The glymphatic pathway" showing the flow of CSF from the pre-arterial CSF influx, through the surface and penetrating arteries, into the brain parenchyma, and then out through the paravascular space. Below the diagram is a legend for "Metabolic Waste Clearance" involving Neuron, Astrocyte, Aquaporin-4, Amyloidβ, and Cerebrospinal fluid. At the bottom right is a fluorescence microscopy image of neurons and astrocytes.

The bottom of the window features a toolbar with icons for "Learn", "Add new", "Learn", "Edit", "Read", "Compose", "Tools", and "Alarm".
